

# Global Health and Humanitarian Medicine Course Development

## Project Summary

### Problem

Address limited global access to public health and tropical medicine training for national staff that impacts quality of patient care.

### Proposed Solution

Scale up an online, low cost, part-time course on public health and tropical medicine for MSF national staff in several countries. Prepare national staff to take the internationally accredited exam for the Diploma in Tropical Medicine and Hygiene.

### Potential Impact

- Improve patient care in the field
- Share knowledge more widely by bringing teaching from the best global experts to MSF staff
- Support national staff in enhancing their development

### Viability

- Extends an existing MSF learning through online learning tools

### Risk Mitigation

- Builds upon a successful pilot programme
- Leverages partnerships in the Global South

### Scalability

- Online capabilities create greater scalability

**Area/Type:** HR, Learning and Development; Incubator

**Sponsor/Support:** MSF UK

**Length/Project Status:** 2.5 years; **ONGOING**
