

# Inclusions of Persons with Disabilities

## Project Summary

### Problem

Significant need to address inclusion of people with disabilities in humanitarian services (representing about 15% of global population and 80% living in developing countries).

### Proposed Solution

Raise awareness in MSF offices and in the field. Assess current activities, learn from best practises, produce guidelines on inclusion, and provide transformative training for MSF staff.

### Potential Impact

- Articulated need with high potential impact
- Addresses an institutional gap
- Raises awareness and establishes the framework for program inclusiveness

### Viability

- Strong project team and sponsorship
- Engages people with disabilities on the project
- Taps into both MSF skills and talent and external NGO experiences and expertise

### Risk Mitigation

- Significantly expands break-through transformational and agile approach

### Scalability

- Engage MSF ambassadors for solution design, buy-in and to be change agents in scaling

**Area/Type:** Medical R&D; Incubator

**Sponsor/Support:** MSF Norway

**Length/Project Status:** 1.5 years; **ONGOING**
